Canvey Island Southern Shoreline Improvements

We are planning and improving the coastal protection at the southern end of the island. Known as the 'southern shore', this is the southern shore of Canvey Island. The aim is to maintain the existing high level of flood protection for thousands of homes and businesses, and to improve the infrastructure on Canvey Island in 2023.

A coastal view of the southern shore of Canvey Island.

The work will be carried out in phases which are spread over the winter to the summer and the summer to the autumn. These phases are also spread over the winter to the summer and the summer to the autumn.
